# Computer Forensics

The National Forensics Practice Group at Marcum specializes in providing Computer Forensics, Forensic Accounting Services, conducting fraud investigations, and assisting counsel in litigating criminal cases. Our team of Partners, Directors and Professionals are highly credentialed and have experience in providing testimony before state and federal courts. Marcum brings 60 years of business sense in addition to legal acumen to the litigation process, opening new avenues and a fresh perspective to the cases in which we work.

Marcum Computer Forensics is a team of professionals committed to preserving and analyzing evidence and preventing data destruction. We deliver our results in an understandable, usable format, so you spend less time reviewing irrelevant data and more time focusing on your case. Our goal is to provide a comprehensive analysis of the evidence, quickly and while staying within budget.

Our Computer Forensics Staff can assist you in cases involving:

- Intellectual Property
- Bankruptcy
- Divorce
- Human Resources
- Email Examinations

- Cell Phones
- Fraud
- Criminal
- Civil

Regardless of what type of case it is, electronics are used on a daily basis. Cell Phones, Tablets, Laptops... This means in every case there is a good chance potential evidence is being overlooked. Forensic Analysis can answer questions such as these while keeping your evidence preserved:

- Has the Hard Drive been wiped?
- Has there or was there an external device such as an External Drive, or Thumb Drive connected to the computer?
- What files were copied to the external drive?
- When was the Operating System Installed?
- Who was the last user to log in?
- When were files accessed or modified?
- Are there any revisions of modified files on the computer?
- What kind of Images are on the computer?
- What files were deleted?
- Are there any deleted txt messages or voicemails on the phone helpful to your case?
